--------------------------	--

SEMS (Shareholder-Employee-Manager System)

(4/2022 - 6/2022)

Customer	Me
Description	<ul style="list-style-type: none"> - The project is built on the request of a client who is a fictional company. They asked to create a website that connects to 2 separate databases from which all general information of the company is displayed: <ul style="list-style-type: none"> + Total salary of all employees with different roles + The gender ratio of all employees in the company + Total salary of all employees by gender in each role + Total number of employees by ethnic group - Solution: For each database, it will be a separate service, the client and the services can talk to each other through a gateway. Gateway is the place to directly process the request from the client, from there request to the service and get the response back. - Code: https://github.com/VietAnh188/sems-micro
Team size	1
My position	Developer
My responsibilities	<ul style="list-style-type: none"> - UI/UX Design - Manual testing - Create Database
Technologies used	<ul style="list-style-type: none"> - Programming language: Typescript, Javascript - Front-end: Reactjs, Redux, React-router-dom, SCSS - Back-end: Nodejs, Expressjs, Prisma - Database: Mysql, SQL Server

Defect Removal Effectiveness Calculator

(6/2022 - 6/2022)

Customer	Me
Description	<ul style="list-style-type: none"> - The project is a website that can count DRE and export to CSV file - Production: https://dre-calculator.herokuapp.com/ - Code: https://github.com/VietAnh188/dre-calculator-server
Team size	1
My position	Developer
My responsibilities	<ul style="list-style-type: none"> - UI/UX Design - Manual testing - Deployment
Technologies used	<ul style="list-style-type: none"> - Programming language: Javascript - Front-end: HTML, CSS - Back-end: Nodejs

Pet Social Network

(3/2022 - 4/2022)

Customer	Me
Description	<ul style="list-style-type: none"> - This is a project to create a social network for pets. A place where pet owners can exchange information, ask questions, seek help and even trade their pets. - No demo site yet, download the source code and run it. - Code: https://github.com/VietAnh188/petsocialnetwork
Team size	1
My position	Developer
My responsibilities	<ul style="list-style-type: none"> - UI/UX Design - Manual testing - Create Database
Technologies used	<ul style="list-style-type: none"> - Programming language: Javascript - Front-end: Reactjs, Redux, React-router-dom, Scss - Back-end: Nodejs, Expressjs, Mongoose

	<ul style="list-style-type: none"> - Database: MongoDB - Other: axios, nodemon, bcrypt, dotenv, helmet, morgan, react-file-base64
